

Make today a breakthrough.

July 17, 2020

Dear School Administrator,

Cure SMA is the leading national organization representing and supporting individuals and families impacted by spinal muscular atrophy (SMA), many of whom experience unique and complex health needs daily.

During the reopening phase of this public health crisis, it remains a high priority that people with SMA remain healthy and safe. The coronavirus (COVID-19) poses a greater threat to individuals with SMA, specifically as it relates to respiratory health and survival. It is of utmost importance to keep this vulnerable community as safe as possible.

Therefore, as your school considers in-classroom learning during the summer/fall, it is imperative that children of individuals with SMA be afforded the opportunity to learn at home to continue isolation and social distancing for a longer time to ensure the health of the person with SMA. We request your continued support for virtual or e-learning opportunities for the child of a person with SMA—even if your school reopens during the fall session with enhanced safety and social distancing precautions—so that the child's education will continue.

If you have any questions or are in need of additional information about SMA, please contact us at info@curesma.org.

Sincerely,
